Subject: Microsoft Settlement

I fewel government is too involved in our lives. Where attention is needed is is lacking like controlling terrorists in this country. Microsaoft is a business and should be allowed to operate as such. What about a free enterprise system and competition? Why are public utilities allowed to operate as they do? Microsoft has excellent products and I haven t found anything worth changing too. They should be allowed to motor along at their own pace without the interruption and input of our fine government.
